Mission Statement

We are a residential, liberal arts college that prepares young adults to lead productive and fulfilling lives.

We provide an excellent education based on close student-faculty contact and a well-rounded course of study. We encourage students to explore new ideas, develop a personal set of values, and broaden their knowledge of the liberal arts disciplines of the arts, the humanities, and the social and natural sciences.

Our nurturing campus environment supports rigorous scholarship and the growth of intellectual, personal, social, and leadership skills crucial to understanding a changing, diverse, and technological world.
